The shark, seizing the handspike in its treble row of teeth, with one shake of its head whipped it out of the boy's hands: and then rushing on through the water, was seen grinding the timber into small fragments, and swallowing it as if it had been so many crumbs of bread or pieces of meat. The blade of the axe, guided with an unswerving arm, fell right upon the snout of the shark, just midway between its nostrils, cleaving the cartilaginous flesh to the depth of several inches, and laying it open to the bones. Some assert that it is only a leap, and this is the prevailing opinion.

But whether it was that his energy had become prostrated by fatigue and the hope. But come, lad, don't let us despair. Would that do, Ben? To console him for this unpleasant knowledge, however, he also knew that in the ocean, where they were then afloat, storms are exceedingly rare, and that ships are often in greater danger from the very opposite state of the atmosphere,—from calms.

Suren Sargsr rated it liked it Nov 28, Therefore, you will see the original copy. creatures are not fish in the true sense of the word, but "molluscs," of the genus *Loligo*; and the name given to them by the whalers of the Pacific is that of "Flying Squid. Up to the last moment those unfortunate beings had been kept under hatches, under a grating that had been fastened down with battens.
