Other medical specialties Inherent in the work produced by radiologists and histopathologists is the fact that virtually every clinical act we perform is available for re-interpretation or review at a later date. We only use this information to personally address you in your newsletter. Self-prompting verbalization of the focus of attention has also been shown to be an effective strategy in reducing search satisfaction Errors in Radiology.

Hypervascularpancreaticmetastasisfromrenalcellcarcinomaarrownotre Sleep deprivation has been shown experimentally to produce effects on certain mental tasks equivalent to alcohol intoxication [42]. Presenting a small number of key images chosen by the meeting conveneras opposed to using the full PACS study file, is a way to reduce the potential for loss of anonymity of the patient and the reporting radiologist during QI Errors in Radiology, while maintaining the meeting focus of

the key learning points [61]. The best and the rest:
revisiting the norm of normality in individual performance.
Strategies for error mitigation have centered around the use of checklists,
the interpretative errors two cases of tumour were
misinterpreted as infarct. Expert witnesses are frequently
influenced by their knowledge of the outcome in determining
whether a radiologist, acting reasonably, ought to have
detected an abnormality when reporting a study prior to the
outcome being known, and thus in suggesting whether failure to
detect the abnormality Errors in Radiology negligence.
